ADAPTIVE COMPLETE

A Dietary Supplement to Support
Healthy Testosterone Levels*

Adaptive Complete is a nutritional supplement designed to support hormone balance in men.*

Adaptive Complete is geared specifically toward supporting testosterone levels in men. Ultimately, the mechanisms of action at play extend beyond the dominant male hormone into mitochondrial energy and ATP synthesis support, protection against the degradation of CoQ10 within the mitochondria itself, and one of the most vital aspects to men's health, metabolic support.*

Adaptive Complete Supports:

- Virility*
- Healthy testosterone levels*
- Metabolism*
- Circulation and stamina*
- Performance and endurance*
- Hormone Balance*

About the ingredients:

PrimaVie®

PrimaVie®, a clinically proven and high quality Purified Shilajit from the Himalayas, supports free and total testosterone levels. PrimaVie® consists of dibenzo-pyrones (DBPs), DBP-chromoproteins (DCPs), fulvic acid and forty different trace minerals. Clinical studies have shown that PrimaVie® can support exercise endurance and overall fitness levels and has been shown to up-regulate genes in skeletal muscle coding for synthesis of collagen.*

Maca

Maca is a hardy plant root cultivated high in the Andes of Peru and has been used by native peoples for thousands of years. According to literature, maca is a powerful adaptogen and is an ancient nutritional source known for its ability to support the endocrine (hormone) system in men.* It is used for supporting libido, fertility, menstrual cycles, menopausal symptoms, adrenal gland function, and energy levels.* It is also well known for balancing hormones.*

Deer Antler Velvet

Deer Antler Velvet has been used as an ancient tonic throughout Asian Cultures and religions for centuries to support libido. Research has shown that Antler Velvet supports androgenic and gonadotropic effects.* It has also been shown to contain biologically active substances including estrone, testosterone and a substance similar to progesterone. Because of its interaction with the endocrine system, deer antler velvet may support menopause as well.*

Fenugreek

The metabolic supportive effect of Fenugreek was thought to be due to formation of a colloidal-type suspension in the stomach and intestines when the mucilagenous fiber of the seeds is hydrated, therefore affecting gastrointestinal transit, and slowing glucose absorption. The connection between testosterone and metabolic issues has been well documented and has a significant correlation in terms of natural approaches to supporting metabolism, testosterone levels and libido.*

Supplement Facts

Serving Size: 2 Capsules

Amount Per Serving

Proprietary Blend of Maca (<i>Lepidium meyenii</i>) Root Standardized Extracts	750 mg
yielding Macamides	2.25 mg
Macaenes	2.25 mg
Glucosinolates	2.25 mg
Fenugreek (<i>Trigonella foenum-graecum</i>) Seed Extract	300 mg
yielding saponins	150 mg
PrimaVie® Shilajit fulvic acid complex	250 mg
Deer Velvet Antler Powder	100 mg

Other Ingredients: vegetable cellulose (capsule), microcrystalline cellulose, vegetarian leucine.
